Deceased Status	15
Deferred Service (status W)	16
Status Change In Progress (Status X)	16
Pensioner	17
Possible Resolutions before Service Desk +	19
Using Service Desk + (HALO)	20

Criteria

- An **exception 8309** occurs when there is a mismatch between dates held in the Compendia sets
- An **exception 8310** occurs when there is a scheme/status corruption on the member record
- An **exception 8311** occurs when there is a corruption on the member record in the Tax History set
- An **exception 8312** occurs when there is a corruption on the member record in the Hours History set
- An **exception 8315** occurs when there is a corruption on the member record in the Linked Employment set

All error formcodes are affected by corruptions.

The corruption will be found in any or, all these sets:

- Linked Employment
- Employment
- Protection
- Leaver
- Deferred
- Service History
- Service Group
- Award - where status of PN
- The Header
- Automated Events – check when changing from status of unclaimed benefits.

Useful Information

Disqualifying break

A disqualifying break is a gap in employments resulting in membership not linking for benefit calculation purposes.

Corruptions can be caused due to the fact that the period for a disqualifying break has now changed, but the system is not reflecting the change and is now showing an incorrect status.

1995/2008 Scheme – 1 year

The pension for the earlier period of membership would be calculated on pay at last day of employment. New membership would use current pay unless another break occurred.

2015 Scheme – 5 years

Earlier periods would be calculated separately and not link, only attracting revaluation by Pensions Increase. New period of benefits will receive in-scheme revaluation (Treasury Order + 1.5%).

Statuses

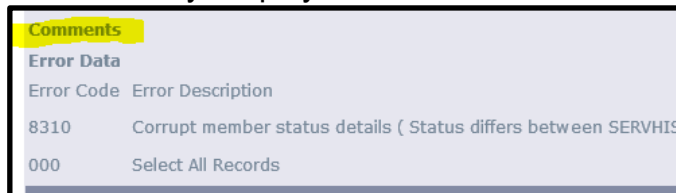

A – Active **
AP – Active Pensioner
X – Status Change in progress **
W – Deferred **
U – Unclaimed benefits **
PN – Pensioner **
D - Deceased member
WP – Deferred pensioner – where member has claimed some pension but not all
XP - Leaver pensioner – where member has claimed some pension but not all
N - No Liability **
Z - Record being updated

** = Can appear in the Service History and Service Groups.

If you see NR in Service Groups, focus on the N, it is a variation of No Liability.

Process

1. Use the member number to open up your error and another tab to enable you to see the sets on Compendia.
1a). To open up your error: **Data maintenance, error handling**, tick the 8310 error and then **submit**. Click **Ok** on the next screen, tick **view form data** and click **submit**.
2. Using the member number, check the Data Management main inbox for any emails related to the case.
If an email is found, action appropriately
3. Check for any Employer comments as these can be useful

Comments	
Error Data	
Error Code	Error Description
8310	Corrupt member status details (Status differs between SERVHIS
000	Select All Records

4. Check the top left corner of the corruption error as this will give you a hint as to where the corruption lies, however, checks should still be made in all sets
5. Using the other tab, check all sets. The most common sets for corruptions are **Linked Employments**, **Employment**, **Service History**, **Service Groups**, **Conts & TPP** and **Hours History**.
See above under '**Criteria**' for all sets to be checked.
6. See below sections for more information regarding corruptions in individual sets, possible resolutions before going to Service Desk + and how to send a Compendia Change request using Service Desk +.
7. If you are unable to action your error due to awaiting Service Desk, keep the error on Compendia and pend the task on Operations Manager (OM).
If you have been able to action your error, you can delete and book out the error, even if you have sent a request to Service Desk +
8. It is recommended that you keep notes of all Service Desk requests you send to remind yourself which actions you need to take, once Service Desk have completed their side

Always check the Business As Usual (BAU) at the end of every case.

If task is selected for Quality checks and a query has not needed to be sent, you need to add a note to the Electronic Document Management (EDM) explaining what you have done with the error so that the Quality Coach is able to assess your actions as accurately as possible.

EDM Title: ** ERROR EA **** ID ** YE **** INSERT BRIEF ACTIONS HERE**

Employment Set

The fields to check in this set are the start/change date and the end date.

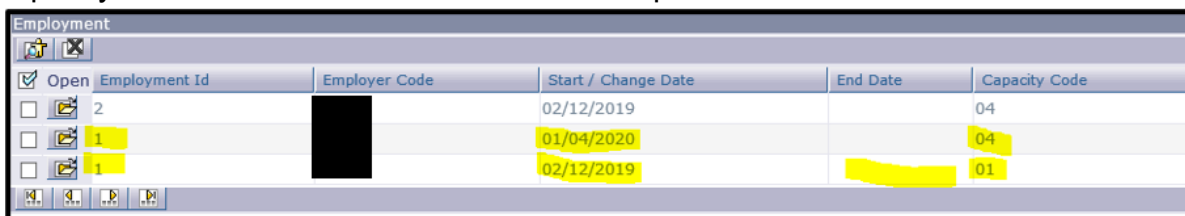

Identify any changes made to a post, it is likely that the end date (the day before the change) is missing.

If there is a change and it is a part time employment, there may be a split to the yearly hours. Be sure to check the **Hours History** set in this instance.

If there is not a change to a post in the **Employment** set, you will need to compare dates of all employments with the other sets.

For example -

The **Employment** set shows that we are missing the end date for the first line of ID 1, once the capacity code was amended – this is the corruption.

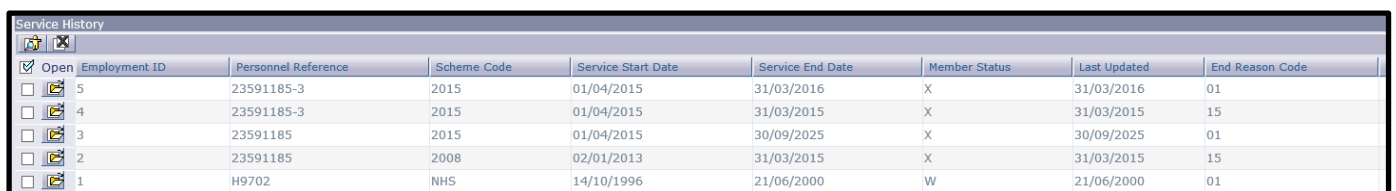

Open	Employment Id	Employer Code	Start / Change Date	End Date	Capacity Code
☐	2		02/12/2019		04
☐	1		01/04/2020		04
☐	1		02/12/2019		01

We will need to complete a **Compendia change request** to insert the end date (31/03/2020) for the first line of Identification (ID) number 1.

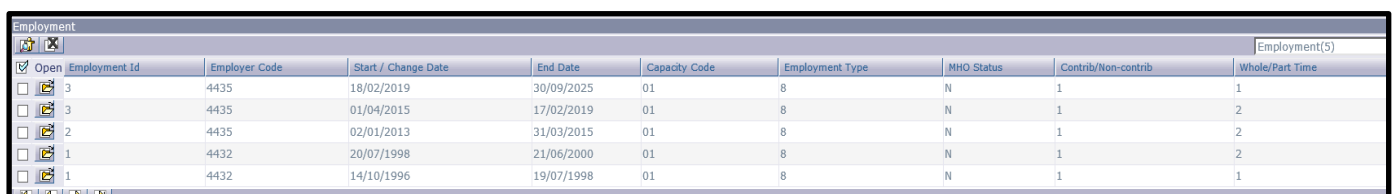

It is possible for an employment to be missing completely from this set. In this instance, a Service Desk request would need to be submitted to ask them to restore the missing post. Give them as many details as you can.

For example -

The Service History set shows ID 4 and ID 5 (linked) but neither can be found in the **Employment** set – this is the corruption

Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code
☐	5	23591185-3	2015	01/04/2015	31/03/2016	X	31/03/2016	01
☐	4	23591185-3	2015	01/04/2015	31/03/2015	X	31/03/2015	15
☐	3	23591185	2015	01/04/2015	30/09/2025	X	30/09/2025	01
☐	2	23591185	2008	02/01/2013	31/03/2015	X	31/03/2015	15
☐	1	H9702	NHS	14/10/1996	21/06/2000	W	21/06/2000	01

Open	Employment Id	Employer Code	Start / Change Date	End Date	Capacity Code	Employment Type	MHO Status	Contrib/Non-contrib	Employment(5)
☐	3	4435	18/02/2019	30/09/2025	01	8	N	1	1
☐	3	4435	01/04/2015	17/02/2019	01	8	N	1	2
☐	2	4435	02/01/2013	31/03/2015	01	8	N	1	2
☐	1	4432	20/07/1998	21/06/2000	01	8	N	1	2
☐	1	4432	14/10/1996	19/07/1998	01	8	N	1	1

Hours History Set

The fields to check in this set are the start and end dates as well as employment IDs.

There should be a row for every part time period in the **Employment** set that has been updated.

This set should correspond with the **Employment** set.

Where there is an issue with the hours end date, or missing hours; we can fix this via Data Maintenance > Employment Details > Yearly Hours.

A Service Desk request would only need to be sent where the hours start date is incorrect, or the ID number against the hours is incorrect, or you need to delete yearly hours but the system will not allow you.

Remember –

There is a system issue where changes to part time on the 2015 transition date are incorrectly reverting to whole time, but yearly hours are still held for the part time period.

If we hold hours for what appears to be a Whole Time (WT) employment, check the **EDM ROOT** folder for a note regarding a change.

Service History Set

The fields to check in this set are the employment ID, start and end dates, the last updated date and the end reason codes.

The start and end dates for each ID should match those in the **Employment** set. If there is a mismatch, double check these in the **Conts & TPP** set to try to determine which dates are correct.

If there is still any doubt, double check for any correspondence in the **EDM** and contact the Employing Authority (EA) if necessary, using a 1st request query template.

The last updated date should match what we hold in the **Conts & TPP** set for each employment ID.

If an employment is closed, the end date and last updated date should match.

The end reason codes should correspond with what has happened to that particular employment.

For example -

If an employment has terminated, the end reason code should not be 05.

If an employment is linked, the original ID in the link should have end reason code 15, if it has been updated.

Service History								
☒ Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code
☐	24	92SOLO 6154150 DV	NHS	01/04/2015	31/03/2017	X	31/03/2017	01
☐	23	6154150 LOCUM DV	NHS	01/04/2015	31/03/2017	X	31/03/2017	01
☐	22	L83056	2015	01/04/2022	30/09/2023	X	30/09/2023	01
☐	21	SOLO DN	2015	01/04/2022	31/05/2022	X	31/05/2022	01
☐	18	L83056	NHS	08/06/2021	31/03/2022	X	31/03/2022	15
☐	17	SOLO DN	NHS	01/04/2019	31/03/2022	X	31/03/2022	01

On the above example; ID 17 and ID 21 are linked, however, the end reason code against ID 17 shows as '01' but due to the link, it should show as '15' – this is the corruption.

Another example of a **Service History** set corruption -

ID 4 and ID 5 are linked, however, the start dates on both posts are the same – this is the corruption.

Service History								
☒ Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code
☐	5	23591185-3	2015	01/04/2015	31/03/2016	X	31/03/2016	01
☐	4	23591185-3	2015	01/04/2015	31/03/2015	X	31/03/2015	15
☐	3	23591185	2015	01/04/2015	30/09/2025	X	30/09/2025	01
☐	2	23591185	2008	02/01/2013	31/03/2015	X	31/03/2015	15
☐	1	H9702	NHS	14/10/1996	21/06/2000	W	21/06/2000	01

Conts & TPP Set

The fields to check in this set are the employment ID and start and end dates.

The earliest start dates for each ID should match those in the **Employment** and **Service History** sets.

The latest end date for each employment ID should match the last updated date in the **Service History** set.

If an employment is closed, the end date should match those in the **Employment** and **Service History** sets.

Service Groups Set

Employments are linked into 'groups' depending on what Scheme/status they fall under. Whenever there is a change to scheme or status, or a disqualifying break, there will be a separate row for that service in the **Service Groups** set.

Some of the Service Group rows link, as they do in the **Service History** set. This is when there is a change from the 1995/2008 Scheme to the 2015 Scheme, but the employment status remains the same.

For linked rows, the 1995/2008 scheme will have a Group Reason code of 25.

The Group End date of the linked 1995/2008 service will always match the end date of the 2015 service.

For example -

If the 2015 service row does not have an end date, the 1995/2008 row will also show as blank.

Where we have '**Active Pensioner**' status, the **Service Groups** set should also reflect this and even those groups may be linked, the **PN** period should show as closed with the PN status, whilst the **active** period should remain open with the A status.

For example -

Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code
☐	8	33611084	2015	02/09/2025		A		
☐	7	22360847	NHS	01/04/2015	31/03/2022	PN	31/03/2022	15
☐	6	22360847	2015	01/04/2022	29/08/2025	A	29/08/2025	01
☐	5	22360847	NHS	29/11/2010	31/03/2015	PN	31/03/2015	15
☐	4	21698968	NHS	05/10/2009	28/11/2010	PN	28/11/2010	01
☐	3	21379615	NHS	20/04/2009	13/09/2009	PN	13/09/2009	01
☐	2	20925862	NHS	19/08/2008	13/04/2009	PN	13/04/2009	01
☐	1	9	NHS	21/01/2003	14/08/2008	PN	14/08/2008	01

In the **Service History** set above ID 1, 2, 3, 4, 5 and 7 are all **Group 1** with **PN** status. ID 6 and 8 are **Group 2** with **A** status.

The **Service Groups** set shows -

Open	Service Group ID	Group Scheme Code	Group Start Date	Group End Date	Group Status	Qualifying Service	Service Groups(2)
☐	1	NHS	21/01/2003		A		25
☐	2	2015	01/04/2022		A		

Group 1 as A status = **incorrect**

Group 2 as A status = **correct**

Group 1 without an end date = **incorrect**

Group 2 with an end date = **correct**

Group 1 is the corruption as it should have **PN status** to match with the **Service History** set and it should also reflect the same **end date** as the one shown in the **Service History** set, for the last PN period (**31/03/2022**)

Tax Year History Set

National Insurance (NI) earnings, unlike in the **Conts & TPP** set, have a yearly start date of 06/04/**** and end on 05/04/****.

When an employment closes, we record the NI earnings for the final and penultimate year.

For example –

If an employment started on 08/01/2007 and closed on 20/12/2007, the two rows for the NI Earnings would be from 08/01/2007 - 05/04/2007 and 06/04/2007 -20/12/2007.

If the final and penultimate year NI earnings cross a linked employments' transition date, for example, employment closed 31/07/2015, it would be recorded across three rows under the corresponding Employment ID shown in the **Employment** set.

For example –

ID1 06/04/2014 – 31/03/2015

ID2 01/04/2015 - 05/04/2015 (enter 0.00 figures)

ID2 06/04/2015 - 31/07/2015

Protection & Linked Employment Sets

Check the **Protection** and **Linked Employments** sets to identify whether the member has None or Full Protection and (if relevant) the transition date and any linked employment IDs.

In the **Linked Employments** set, check the following fields:

- Pre-Remedy EMPID
- Remedy EMPID
- Post Remedy EMPID

If there is evidence of linked employments in the **Service History** set, the **Linked Employments** set should show all three of these fields as populated with an employment ID, or 0 (if there is only a 2 way link)

To check for linked employments in the **Service History** set:

- Look for end reason code '15'
- Check reference numbers match
- Check the employment dates; the most common transition dates are 31/03/2015 – 01/04/2015 and 31/03/2022 – 01/04/2022. It is possible to have random transition dates and so a check should be made in the **Protection table** set, looking at the 'Protection expiry date' field.

For example -

ID 2 and ID 5 show as linked in the **Service History** set

Service History								
☒ Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code
☐	5	27494080	2015	01/04/2022	30/06/2025	X	30/06/2025	01
☐	4	27494080-3	NHS	01/10/2019	30/11/2019	PN	30/11/2019	01
☐	3	27494080-2	NHS	01/12/2019	14/12/2020	PN	14/12/2020	01
☐	2	27494080	NHS	06/09/2018	31/03/2022	PN	31/03/2022	15
☐	1	11278046	NHS	01/03/2007	31/07/2014	PN	31/07/2014	01

However, the **Linked Employments** set is blank

Linked Employments			
☒ Open	Pre-Remedy EMPID	Remedy EMPID	Post-Remedy EMPID

This is the corruption and a Service Desk request would need to be sent to ask them to add a row in the **Linked Employments** set as:

PRE = 0

REMEDY = 2

POST = 5

‘Pre-Remedy EMPID’ Field = For employments with start date before 01/04/2015

‘Remedy EMPID’ Field = For employments with a start date between 01/04/2015 – 31/03/2022.

Please note: this field should never be populated with a zero and if it is populated with a zero then that will be the corruption. See below for examples and more details.

‘Post Remedy EMPID’ Field = This is usually for employments with start date 01/04/2022, unless, the employment it is linked to has a start date prior to 01/04/2015. In this instance, the linked employment with start date 01/04/2022 must fall under REMEDY and not POST

For example -

ID 8 and ID 9 are linked; ID 8 has a start date before 01/04/2015 and ID 9 has a start date of 01/04/2022

Employment					
					
☒	Open	Employment Id	Employer Code	Start / Change Date	End Date
☐		12	4613	01/10/2024	30/04/2025
☐		11	4613	01/11/2024	30/04/2025
☐		9	4613	01/04/2022	30/06/2023
☐		8	4613	03/11/2006	31/03/2022

In the Protection table, we can see that the member was eligible for McCloud and so was protected in their legacy scheme until 31/03/2022

Protection Table				Protection
Member Number	55	Scheme Code Before Transition	NHS Pension 1995 Scheme	
Normal Pension Age	28/05/2018	MHO or Special Class Indicator	Yes	
Normal Pension Date	31/03/2022	Type of Protection	McCloud	
Protection Expiry Date		Eligible to Opt Out Protection	No	
Option Letter Create Date		Opt Out Decision		
Opt out Decision Type		Date Reply Received		
Date Transition Completed		Override 2015 Scheme		
Remedy Eligible	Y	Eligibility Reason	NHS Pensionable service	
Eligibility End Date	31/03/2022	Orig Prot Type	McCloud	
No Conversion	Post April 2015 Pensioner	Log Date and Time		

The Linked Employments set correctly shows as:

PRE = 8
REMEDY = 9
POST = 0

Linked Employments				Linked Employments(1)
Member Number		Pre-Remedy EMPID	8	
Remedy EMPID	9	Post-Remedy EMPID	0	
Final Salary Link		Log Date	20/02/2026 13:43:05	

Scheme corruptions

Check the **Header**, **Member basic Details** set, **Service History** set and **Service Groups** set. In addition, check the **Protection** set.

Each time there is a change to the Scheme in **Service History**, there should be an additional row in the **Service Groups** set.

If the **Service History** and **Service groups** appear to be correct then check that the Scheme in the **Header** and **Member Basic details** set matches the Scheme for the latest service, as this is a common mismatch.

In **Service Groups** there are sometimes multiple rows for the 2015 scheme service, when there should only be one. In this case, confirm the correct row (the one with the earliest start date matching the **Service history** set) and delete any others, considering any refunds, transfers out or previous pension payment applications.

Status Corruptions

Initial checks should be made to the **Header**, **Member Basic Details** set, **Employment** set, **Service History** set and **Service Groups** set.

If there are no open employments on the record, check that the **Header** status and all others do not still show as Active. If so, this will need to be amended via a **Compendia change request**.

No Liability (N - Refunded Service or Transferred Out)

Check **Leaver** set – whenever the **Service History** set has a status of no liability, there should be corresponding information in the **Leaver** set.

Where there has been less than two years' service and a disqualifying break, the member must have a refund of pension contributions (unless there has been an approved break or member over normal retirement age – see below). Once the refund has been paid, the status will show as no liability and the **Leaver** set will be populated with details of the refund.

A member is entitled to a refund where they have less than 2 years calendar service and there is no disqualifying break. However, the member would then need a 24-hour break before re-joining the scheme.

If there have been two or more separate refunds, and there are multiple rows in the **Leaver** set, they should be included in separate Service Groups, even if there is no disqualifying break. They could also transfer out, **EDM** will likely have **TV Out folders** for this with documents as well as details in the **Leaver** set.

Approved break – Exit code 8 and 10

If there is less than 2 years' service and a disqualifying break, but the earlier service have an exit code of 8 or 10 (approved break), the employments will link and not require a refund.

Unclaimed benefits (status U)

Where all employments are closed and the member has less than 2 calendar years membership, the status becomes U, Unclaimed Benefits. This is because to qualify for a pension, a member must have at least 2 calendar years membership. Once someone has more than 2 years, the record would become Deferred, status W.

U is a placeholder. If a new employment is added to the record within 5 years, the employment is made Active.

If 5 years pass, the member can only claim the period as a refund to make it No Liability.

Where there has been less than two years' service, a disqualifying break and the refund has not been paid, the status should be set to unclaimed benefits.

There will be a row in the **Leaver** set with corresponding start/end dates, but it will only show 0.00 in the pay fields. This is known as an unclaimed refund.

If it appears that there is an unclaimed refund, also check for evidence in the **EDM (RF57 form)** that the refund has not been paid. If there is no evidence, then the status will be correctly set to unclaimed benefits, **but only where there is a disqualifying break**.

If there is no disqualifying break (for example, if 2008 scheme membership had been set to U but now links to 2015 service), the incorrect refund row in the **Leaver** set needs to be deleted and the status set to X or A.

In addition, the automated event letter that relates to this will also need to be deleted. You can delete any automated event disclosure letters in **Data Maintenance, maintain automated events**.

2015 Scheme only -The records are correct to show as Unclaimed benefits where the member left more than 2 months ago and they have a qualifying service marker of N. This is because of the 3 month disclosure regulation. If the member re-joins within 5 years, the service groups are re-opened and the status updated.

There are issues with the qualifying service marker in the **Service Groups**, be wary with these. We cannot influence this and will require a **Compendia Change request**.

Deceased Status

Where a member passes away and we are notified, the **Header** may be changed to deceased very quickly.

For a death in service or death on preservation, the **Header** will not match other sets.

Do not mark time on these records as this could cause letters to be issued in error.

Where amendments are required and this discrepancy is present, before anything is put into payment, the **Bereavements Team** need to roll back the workflow so the status is changed once more for amendments to be made.

Deferred Service (status W)

Check **Deferred** set - whenever the **Service History** set has status of deferred, there will be a corresponding row in the **Deferred** set.

Where there has been more than two years' service and a disqualifying break, service will be deferred.

If 1995/2008 service is showing as deferred we need to check that it was deferred correctly. It may have originally been deferred as the member had a 1-year break, but now that the disqualifying break is 5 years, it could possibly link to 2015 scheme service.

- In the **Employment** set and **Service History** sets, find the employment with the earliest start date in the 2015 Scheme.
- Then determine whether there is less than a 5 year break between the 2015 scheme start date and the end date of the latest deferred service. If so, the deferred service should 'link' to the 2015 scheme service and should therefore show the same status as the 2015 scheme service that it links to.

From the initial 5 year check, move back through each employment to establish the status of each one. The check from this point, for 1995/2008 service, will be for a disqualifying break of 1 year.

For each group of service that should no longer show as deferred, delete the corresponding row from the deferred set.

Where all employments are closed on the record, deleting the incorrect deferred rows will automatically correct the employment status. However, a check still needs to be made to ensure that all fields are now correct.

Where there is an open employment on the record, the status will not automatically correct as a result of deleting the deferred row and a **Compendia change request** will need to be sent.

Status Change In Progress (Status X)

When an employment is first closed it changes to status X and background processes then run to determine what the status of the employment should be set to, it could go to:

- Unclaimed (less than 2 years)
- No Liability (if refunded or transferred out)
- Deferred (when Preservation task runs)
- Pensioner (application received and put into payment).

Cases can remain X for a while, for example complex preservations.

If you have identified that service should be deferred or a refund is due, but where there is nothing in the deferred set or nothing to suggest that a refund has been paid, the status code should be amended to X. System processes will then run and amend the record to the correct status whilst also populating the **Deferred** or **Leaver** sets.

Pensioner

Check **Service History** set for a Pensioner with status still set to deferred.

Draw downs/Partial Retirement do not require a 24 hour break.

Be very careful with form code 0802 errors on Leaver or Deferred Pensioners as only some have been claimed.

For example –

1995 for a 1995 linked 2015 member or 2008 for a 2008 linked 2015 member.

You will need to check **EDM** to see if the retirement was a final retirement (retire and return) and if yes, the employment should not be reopened.

Employers who need to amend should use form SD55E.

If a member claims their legacy scheme benefits but not their 2015 Scheme Benefits and the 2015 Scheme is not claimed before the 24-hour break, this should be status X and not PN, it will need a **Compendia change request**.

A Keep In View (KIV) note would be helpful on **EDM** in case the record reverts back to 2015 PN before it is claimed.

2008, 2015 and 2008/2015 linked members can re-join the scheme after a 24-hour break. New membership would create a new service group.

Most 1995 and 1995/2015 linked members can only re-join from 01/04/2023 with some variations, after a 24-hour break.

For example –

AW8 for 1995 Section only LDOS 02/04/2023

Open	Employment ID	Personnel Reference	Scheme Code	Service Start Date	Service End Date	Member Status	Last Updated	End Reason Code	Service Start Reason	Scheme Category
☐	7		2015	04/04/2023		A				DB
☐	6		2015	04/04/2022	02/04/2023	A	02/04/2023	01		DB
☐	5		2015	01/04/2022	03/04/2022	PN	03/04/2022	01		DB
☐	4		NHS	01/10/2011	31/03/2022	PN	31/03/2022	15		DB
☐	3		NHS	01/04/2007	30/09/2011	PN	30/09/2011	01		DB
☐	2		NHS	18/01/1998	31/03/2007	PN	31/03/2007	01		DB
☐	1		NHS	06/04/1989	17/01/1998	PN	17/01/1998	01		DB

Service Groups							
☒ Open ☐ ☐ ☐							
Service Group ID	Group Scheme Code	Group Start Date	Group End Date	Group Status	Qualifying Service	Group Reason Code	
1	NHS	06/04/1989	03/04/2022	PN	Y	25	
2	2015	01/04/2022	03/04/2022	PN	Y	01	
3	2015	04/04/2022		A	Y		

Here, ID 6 is in group 3 incorrectly.

The 1995 Section in [Service History](#) should be PN and end 02/04/2023. The salary link ends here.

The 2015 Section IDs 5 and 6 should be X, this group covering 01/04/2022 to 02/04/2023.

Emp ID 7 should be a new group, Active, from 04/04/2023.

Possible Resolutions before Service Desk +

“Mark Time”

Go to:

- Data Maintenance
- Employment Details
- Employment History
- Amend
- Select an employment, do not change anything and submit.

This will activate Scheme Manager to review the record.

Check the statuses again afterwards as well as **Leaver** set and **Deferred** set for changes.

Do not mark time on a record where a member is deceased, refer to a Subject Matter Expert (SME) or Process Specialist (PS).

Input Manually

If you have an SS10, SS14, SD55 or SD55T error, you can input this through **Data Maintenance**. This will activate Scheme Manager to review the record.

Check the statuses again afterwards.

You could input manually and then “mark time” again, but ultimately if everything does not set correctly, you will need to submit a **Compendia change request**.

When consolidating, analyse the record and confirm what you intend to do from above with your checker before proceeding.

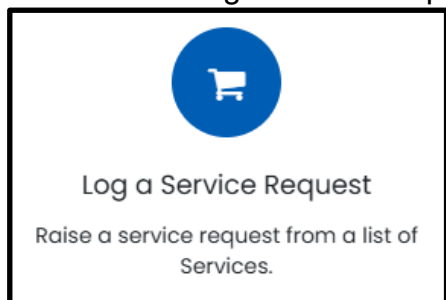

If after these actions the record is still corrupt, submit a **Compendia change request**.

Using Service Desk + (HALO)

To submit a Compendia Change request:

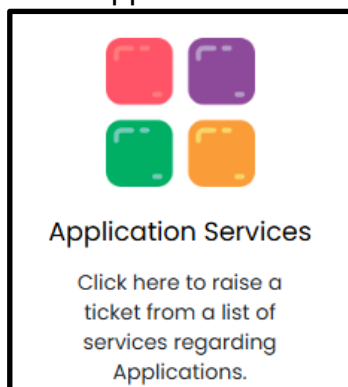

Step 1

Click on the 'Log a service request' box

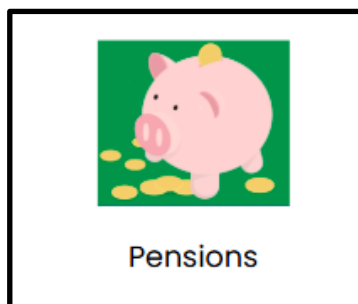

Step 2

Click 'Application services'

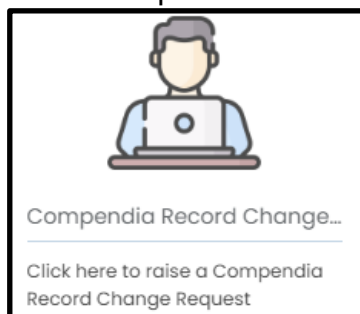

Step 3

Click 'Pensions'

Step 4

Click 'Compendia record change'

Step 5

Complete the relevant details

Type of Record Change * Other	
SD Number: * An eight digit number, ie 12345678 	
Member First Initial * 	
Member Surname * 	
Has a file been corrupted? * No	

1. Select the appropriate option on the drop down for **'Type of record change'**. If there are multiple different changes, select other.
2. Complete the table if you are able to give full and specific details of how to amend the corruption

Please complete the table below before submitting this request: *

Type of Change:	Sets:	Fields:
Scheme Change		
Status Change *		
Service Group Change		
Deletion of form		
Add Conts		
Add Basic		

3. Find the appropriate row for the changes being made. If it is for the **Employment** set, **Conts & TPP** set, **Hours** set or **Service History** set use the 'other' row.

Sets

You are stating which Compendia set needs to be amended. This could also be **Header** and **Member basic details**, if the change is to the scheme or status.

Fields

You are stating which part of that set it is you wish to amend.

For Example -

ID 2 end date

OR

ID 3 last updated

OR

ID 4 entire row

Amendments to be made

This is where you tell them what you would like the field to be amended to, you may be asking them to delete a row or amend a date or add a row.

Reason

This will usually be 'record corrupted'. However, the EA may have requested we amend a record and we are unable to do it through data maintenance and so have to do a Compendia change request.

Therefore, the reason would be '**EA requested *******'.

When on consolidation checking, send this to your checker before submitting to Service Desk +.

You can copy and paste the table below to an email, complete it as per your Service Desk request and send to your checker.

If checker is happy, they will confirm, and you can then submit your request on Service Desk +.

Type of Change:	Sets:	Fields:	Amendments to be made:	Reason:
Scheme change				
Status change *				
Service Group change				
Deletion of form				
Add Conts				
Add Basic				
Additional Pension				
Other				

Once the table is correctly filled out, choose your appropriate site and amend the Directorate dropdown to **'NHS Workforce Services'**.

The Description box may be used for instances where you cannot give exact details of how to fix the corruption, for example; employments completes missing from certain tables. If you have completed the table and there is nothing further for you to request, add 'please see table'.

In the 'contact number' box, insert 'NA'.

Click **'Submit'**.

You now need to copy and paste the request into the **EDM** of the record you are working on. Look for a folder named **'SERVICE DESK REQUESTS'**. If there is not one, you will need to create one.

The EDM note title must include the Ticket number. An example of the title:
COMPENDIA CHANGE REQUEST – ID ** - Ticket ***.**
